PROFESSIONAL SUMMARY

Gen AI / Platform Engineer with 3+ years of experience in LLM evaluation, agentic AI testing infrastructure, and Trust & Safety workflows at Google AI (via GlobalLogic). Built 13 full-stack sandbox apps, synthetic data pipelines across 48 personas, and human-in-the-loop platforms (Python, TypeScript, React, Angular, C++). **Ranked #1 of 11 engineers** in platform throughput. Focused on making LLM systems testable, traceable, and reliable at scale.

TECHNICAL SKILLS

Languages: Python, TypeScript, JavaScript, C++, C#, Go, Java, SQL, Bash, HTML5/CSS3
Frameworks: React, Angular, Node.js, FastAPI, Django, .NET Core, LangGraph, LangChain, PyTorch, Playwright, PySpark, Unity
AI & LLM: RAG, Agentic Orchestration, Prompt Engineering, promptfoo, MLflow, Autogen, AI Safety & Adversarial Testing, Evaluation Frameworks, Synthetic Data, Human-in-the-Loop Systems
Cloud & DevOps: GCP (GCS, BigQuery), AWS (EC2, ECS, S3, Lambda), Docker, Kubernetes, Terraform, Jenkins, GitHub Actions, CI/CD, Linux, Neo4j, Google3 toolchain, Claude Code, Cursor

PROFESSIONAL EXPERIENCE

GlobalLogic (Client: Google AI) — Santa Clara, CA | Oct 2024 – Present

Gen AI Engineer – Responsible AI & Novel AI Testing — Apr 2026 – Present

- Built **13 full-stack sandboxed web apps** (e-commerce, fintech, food delivery, messaging) from scratch to evaluate autonomous browser AI agents and safely reproduce edge cases (TypeScript, Angular, Python).
- Architected synthetic data seeding across **48 multi-modal personas and 9 cloud services**; built a Data Integrity QA suite guaranteeing **100% numerical accuracy**, plus Playwright automation for all 48 test accounts.
- Re-engineered a multi-language video pipeline (1,800+ recordings → 40,000+ clips, 8 languages), cutting processing time **10x**; resolved a critical data-injection blocker in **10 days**.
- Built adversarial evaluation frameworks and scoring metrics for multi-turn agents (**40+ edge cases** found pre-deployment) and PyTorch diagnostic suites for Gemini fallback handling (**50%** faster issue resolution).

Senior Software Developer – Plugin & Data Solutions Architect — Sep 2025 – Mar 2026

- **Ranked #1 of 11 developers** in platform throughput: **2,000+ batches across 460+ workflows** with zero queue backlog; owned Python ingestion/dedup scripts for 80+ workflows and mentored junior developers.
- Designed Side-by-Side human rating interfaces across **19 custom plugin builds** (React/TypeScript, textproto) for multi-model LLM comparison, multilingual vetting, and indirect prompt injection evaluations.
- Built telemetry dashboards for AI agent tracing (**~60%** lower time-to-diagnosis) and warm-pool Docker/Kubernetes sandboxes (**70%** faster initialization).

Software Developer – Python & C++ / Prompt Engineer — Oct 2024 – Aug 2025

- Built Python/C++ backend services serving LLMs at low latency under heavy production loads; ran prompt-injection robustness evaluations with automated assertions.
- Engineered a YAML Editor and Promptfoo Analyzer to validate configs and drive A/B prompt optimization in CI/CD; wrote CoT, persona, and adversarial prompts that improved pass rates.

MassDigi at WPI, Worcester, MA – Game Developer — May 2023 – Aug 2023

- Built AI-driven NPC behavior in Unity/C# and C++ (state machines, behavior trees); optimized memory and asset loading for **60+ FPS**; resolved **30+ integration defects** in agile sprints.

Wipro, Hyderabad, India – Software Engineering Intern (.NET Full-Stack) — Mar 2022 – Aug 2022

- Developed web applications and backend services on the .NET full-stack ecosystem (C#, SQL) under structured mentoring.

SELECTED PROJECTS

- **Agentic AI Evaluation Platform** (Python, LangGraph, FastAPI, Docker, Kubernetes): processed **10K+ test cases daily**; prevented capability drift across **12+ model iterations**; eliminated **95%+ of silent failures**.
- **AI-Native Developer Tooling** (Python, React, TypeScript, AWS Lambda, CI/CD): translated specs into automated test workflows; cut feature-to-production time **40%** across 8+ teams with **30+ plugins**.

EDUCATION

Clark University – M.S., Computer Science (GPA 3.5/4.0) — Jan 2023 – Dec 2024
Malla Reddy College of Engineering & Management Sciences – B.Tech, CS (GPA 3.6/4.0) — Aug 2018 – May 2022

CERTIFICATIONS

Google Gemini for Developers • Microsoft Azure AI Essentials • Pair Programming with AI • Walmart USA – Advanced Software Engineering • Datacom – Software Development
